

**Raccorderia alta - media - bassa pressione
per impianti oleodinamici e alimentari
Acciaio inox 304-316**

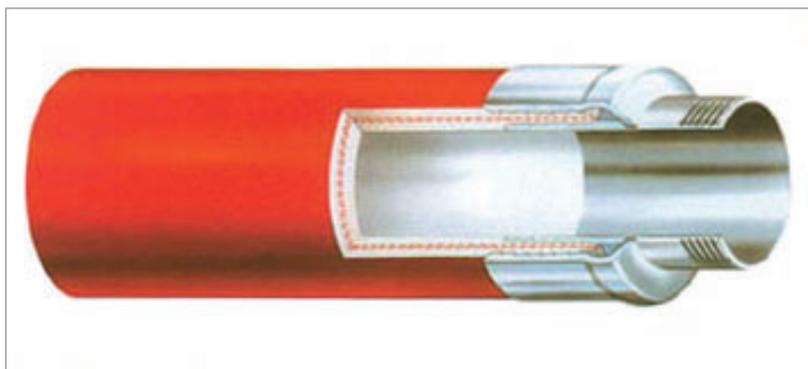

***Fittings for high - medium - low pressure
for hydraulic and F&B systems
Stainless steel 304-316***

Codolo portagomma filettato o a disegno, applicato mediante vulcanizzazione.

Threaded standard stem or realised according to a technical drawing, applied by means of vulcanization.

Codolo portagomma filettato o a disegno, applicato mediante particolare pressatura che elimina il gradino nel sottostrato.

Threaded standard stem or realised according to a technical drawing, applied through a special swage-in system that guarantees a perfect, smooth connection between tube and coupling (no edge).

Per i due tipi di raccordatura sopra riportati, a richiesta, si possono applicare raccordi corrispondenti alle principali normative DIN-SMS-BS-ISS-CLAMP-RJT-IDF; oppure raccordi speciali realizzati a disegno.

For the above applications, a large variety of fittings complying with DIN-SMS-BS-ISS-CLAMP-RJT-IDF standards can be supplied upon request. Special couplings based on technical drawings are also available.
